

Our Outstanding Business Partner for February is JAG Wooster Country Pointe.

Country Pointe is a strong advocate of the Wayne County Schools Career Center Practical Nursing program. They attend all advisory committee meetings, contributing fully with constructive feedback and offer advice regarding the changing needs of the marketplace. They provide enriching learning experiences for the students during the program with varied mental health nursing learning experiences.

Director of Nursing, Barb Bull and her staff ensure a professional work environment that supports the development of best practices in clinical practice and education. They offer support and guidance to all incoming practical nursing students concerning the role and expectations of students as they pursue the profession of nursing.

Country Pointe predominantly hires our practical nursing program graduates. Eighty percent of the nursing team at Country Pointe consists of WCSCC graduates. They are an invaluable partner in clinicals, job placement, internships, and rotations. They help provide professional development for our staff as well.

“Country point, under barbs leadership, serves as a valuable academic clinical partnership with the Career Center practical nursing program,” send adult Ed nursing manager Joan Kanne. “They help develop shared expectations of students and optimal learning experiences that promote greater readiness for practice and safe patient care during the leadership clinical practicum.”

Thank you to JAG Wooster Country Pointe for being such a valuable asset to the career center and our students. Congratulations on being named our Outstanding Business Partner.
